

Tuck & Seek

Hide your cats. Find theirs.

Tuck & Seek is a free iPhone game from Lotus Apps, made for the new iPhone Duo. Each player hides four cats around the house (Longcat, Loaf, Box Cat and Kitten) and takes turns calling squares to find the other's. Held open like a book, one screen shows your friend's house and the other shows yours.

It plays on every other iPhone too: pass and play, a computer opponent, the Daily Peek (one board a day, the same for everyone, with a par to beat), and challenge codes to send a friend. There are no ads, no accounts and no tracking. Tuck & Seek Plus, by the month, the year or for life, includes every theme pack, unlimited online games through Game Center, the tougher computer and the Daily Peek archive, and each other theme is also a small pack of its own that you can preview before you buy.

The facts
